

**DOLINO Kid comfort :**

The integrated DOLINO system is stowed away discreetly in the door handle, and is simply pulled if you need it.

Your door handle remains unchanged in its look and feel, function and its operating safety.

**DOLINO Kid easy :**  
it is quick to attach simply to the door handle.

- operating safety
- to be suitable for nearly all door handles (not usefull for door handle with a conical end)

DOLINO Kid comfort

DOLINO Kid easy

We search for business and license partner who are interested to produce and merchandise our innovation

solutions  
from other perspectives

A child can already stand between 10 and 15 months on its own feet and run, although it is only between 77-86 cm high.

Nevertheless, the child can not reach the door handles.

They are at a height of 96-109 cm.

With DOLINO you move the door handle to the height level of your child.

#### Your child is independent:

In all situations a child can experience at home.

The precondition is:

**The child can freely move!**

The extension of the freedom of your Child, **affects positively in many ways:**

- increases **interest**
- promotes **independency**
- strengthens **self confidence**
- raises **physical abilities** of your child and
- therefore the **intelligence of your child increases**

**Also in borderline situations, the way is free if:**

- it awakes from a bad dream.
- it hurts itself while playing.
- the wind pushes simply the door shut and **your child feels uncomfortable.**
- the child just wants to know if you are still there.
- it needs **escape** in a situation e.g. **smoke emission**
